

Optimized Cascade Process Reference List

Kenai LNG	1 train	1.5 MTPA	Kenai, Alaska, USA
Atlantic LNG	4 trains	14.8 MTPA	Point Fortin, Trinidad and Tobago
Egyptian LNG	2 trains	7.2 MTPA	Idku, Egypt
Darwin LNG	1 train	3.7 MTPA	Darwin, Australia
Equatorial Guinea LNG	1 train	3.7 MTPA	Malabo, Equatorial Guinea
Angola LNG	1 train	5.2 MTPA	Soyo, Angola
Queensland Curtis LNG	2 trains	8.5 MTPA	Curtis Island, Australia
GLNG	2 trains	7.8 MTPA	Curtis Island, Australia
Australia Pacific LNG	2 trains	9.0 MTPA	Curtis Island, Australia
Sabine Pass Liquefaction	5 trains	22.5 MTPA	Cameron Parish, Louisiana, USA
Wheatstone LNG	2 trains	8.9 MTPA	Ashburton North, Australia
Corpus Christi Liquefaction	2 trains	9.0 MTPA	San Patricio County, Texas, USA
TOTAL	25 trains	101.8 MTPA	

CAUTIONARY STATEMENT
 These materials contain forward-looking statements. We based the forward-looking statements on our current expectations, estimates and projections about ourselves and the industries in which we operate in general. We caution you these statements are not guarantees of future performance as they involve assumptions that, while made in good faith, may prove to be incorrect, and involve risks and uncertainties we cannot predict. In addition, we based the forward-looking statements on assumptions about future events that may prove to be inaccurate. Our actual outcomes and results may differ materially from what we have expressed or forecast in the forward-looking statements. Economic, business, competitive and regulatory factors that may affect ConocoPhillips' business are set forth in ConocoPhillips' filings with the Securities and Exchange Commission, which may be accessed at the SEC's website at www.sec.gov.

Quick Reference Card

Advantages of the Optimized Cascade Process Technology

High availability	<ul style="list-style-type: none"> • “Two-trains-in-one” configuration yields approximately 95% plant availability, with high efficiency during turndown
Proven technology	<ul style="list-style-type: none"> • More than 45 years of operation • 25 trains licensed at 12 plants, in excess of 100 MTPA of capacity • Designed and built plants with broad range of ambient temperatures and feed compositions
Flexible operations	<ul style="list-style-type: none"> • Easy to start up, shut down, operate and maintain, with fast startup cycles and wide operating range • Cold boxes retain cold temperatures during extended outages, which greatly facilitate faster startup cycles • Highest plant turndown capability • Rebalancing between refrigeration circuits allows for quick response to changes in operating conditions
High thermal efficiency and low emissions	<ul style="list-style-type: none"> • Use of brazed aluminum heat exchangers, aeroderivative gas turbines, and waste heat recovery integration, yields up to 96% LNG facility thermal efficiency and lower emissions • Refrigerants retained in process and not flared during shutdowns
Integrated design options	<ul style="list-style-type: none"> • Improve overall LNG plant efficiency and economics with integrated heavies removal and/or nitrogen rejection units • Increase LNG production and efficiency with: <ul style="list-style-type: none"> – Combined cycle/cogeneration – Gas turbine power augmentation – Gas and flashing liquid expanders

Advantages of the Global LNG Collaboration

Reputable licensor and EPC contractor — “One Team”	<ul style="list-style-type: none"> • ConocoPhillips as an owner, licensor and operator of LNG facilities, and Bechtel as a world class EPC contractor offer: <ul style="list-style-type: none"> – consistent development and application of best practices for more than 20 years – credibility to LNG developers and their financial institutions
Predictable outcomes	<ul style="list-style-type: none"> • Bechtel’s unparalleled track record of constructing successful projects on time and within budget • Together, ConocoPhillips and Bechtel provide a performance guarantee for LNG production
Owner’s perspective	<ul style="list-style-type: none"> • As an owner and operator of multiple LNG facilities, ConocoPhillips has broad experience in all aspects of the LNG value chain and shares valuable design and operational insight with licensees
Services and support expertise	<ul style="list-style-type: none"> • The Collaboration provides experienced subject matter experts to: <ul style="list-style-type: none"> – contribute in all project phases – provide quality assurance of key equipment – ensure safe, successful commissioning and startups – train operators and provide post startup operational support

Typical Facility Layout
