ConocoPhillips CEO Tells U.S. Chamber of Commerce Members that Crude Oil Exports Can Help Sustain the Domestic Benefits of the Energy Renaissance

HOUSTON – ConocoPhillips Chairman and CEO Ryan Lance today delivered an energy policy speech at the U.S. Chamber of Commerce that appealed to the congressional and executive branches of federal government to lift the outdated and economically constraining national ban on crude oil exports.

In his remarks, “American Energy: Keeping the Momentum Going,” Lance cited the nation’s oil and natural gas industry for supporting 9.8 million domestic jobs, and the recent energy renaissance for providing 40 percent of the growth in the nation’s gross domestic product over the past two years.

He explained that lifting the export ban would enable surplus U.S. light oil that exceeds U.S. refiners’ processing capacity to sell on the world market. This would create additional demand for light oil from the nation’s growing shale producing fields, helping sustain the energy-driven economic stimulation and job creation that has contributed to the rebounding U.S. economy.

Growth in U.S. light oil production in 2014 was a million barrels a day, with further growth anticipated this year. There are currently seasonal surpluses of light oil, and these are expected to extend year-round by 2017. The resulting price discounts on domestic light oil sold to refiners, combined with weak world oil prices, threatens to force proposed development projects below their break-even points. Unless exports are allowed, the pace of drilling would slow, causing domestic job losses and damaging the economy.

Lance expressed agreement with key Chamber positions on energy, among them its call for a national energy policy that provides adequate, stable and affordable supplies while ensuring both national energy security and environmental protection. He also supported Chamber positions favoring opening more federal lands and waters for development, streamlining energy infrastructure permitting, implementing cost-benefits analyses of proposed regulations and promoting fair trade. Further, Lance called for greater collaboration between industry and government.

Lance spoke at a U.S. Chamber meeting in Washington, D.C. His speech was webcast live and may be viewed on the Chamber’s website at <https://www.uschamber.com/event/ceo-leadership-series-featuring-ryan-lance-chairman-and-ceo-conocophillips>.

CAUTIONARY STATEMENT FOR THE PURPOSES OF THE "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

This news release contains forward-looking statements. Forward-looking statements relate to future events and anticipated results of operations, business strategies, and other aspects of our operations or operating results. In many cases you can identify forward-looking statements by terminology such as "anticipate," "estimate," "believe," "continue," "could," "intend," "may," "plan," "potential," "predict," "should," "will," "expect," "objective," "projection," "forecast," "goal," "guidance," "outlook," "effort," "target" and other similar words. However, the absence of these words does not mean that the statements are not forward-looking. Where, in any forward-looking statement, the company expresses an expectation or belief as to future results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, there can be no assurance that such expectation or belief will result or be achieved. The actual results of operations can and will be affected by a variety of risks and other matters including, but not limited to, changes in commodity prices; changes in expected levels of oil and gas reserves or production; operating hazards, drilling risks, unsuccessful exploratory activities; difficulties in developing new products and manufacturing processes; unexpected cost increases; international monetary conditions; potential liability for remedial actions under existing or future environmental regulations; potential liability resulting from pending or future litigation; limited access to capital or significantly higher cost of capital related to illiquidity or uncertainty in the domestic or international financial markets; and general domestic and international economic and political conditions; as well as changes in tax, environmental and other laws applicable to our business. Other factors that could cause actual results to differ materially from those described in the forward-looking statements include other economic, business, competitive and/or regulatory factors affecting our business generally as set forth in our filings with the Securities and Exchange Commission. Unless legally required, ConocoPhillips undertakes no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise.
