RE: Gas Balancing Publication Website Change

Dear Interest Owner,

ConocoPhillips historically has published operated gas balancing statements using web services provided by Enverus. Enverus is discontinuing their Gas Balancing Exchange site in March 2022 and Owner Relations sites in December 2022. Effective April 1, 2022, ConocoPhillips will make the following changes to the publication of our operated gas balancing statements.

Enverus: We will continue to publish operated gas balancing statements to ConocoPhillips' Owner Relations site maintained by Enverus at least through July 2022 but do not intend to publish to Enverus through December 2022. ConocoPhillips recommends that each owner consider retrieving historical statements from Enverus before July 31, 2022. The link to that site is:
<https://secure.oildexdx.com/conocophillips/login.asp>.

Go Forward Plan: Effective April 1, 2022, ConocoPhillips is partnering with both PDS Energy Information and Capitalize Consulting to publish operated gas balancing statements. Working interest owners can use either option to retrieve their gas balancing statements.

- **PDS Energy Information** – The PDS ConocoPhillips Gas Balancing portal will be available beginning April 1st and will enable owners to manage the following:
 - View and download both current and historical statement PDF's (Please note historical data is still being accumulated and certain historical periods may not be available for a few weeks.)
 - Setup preferences for free, automated email delivery of new ConocoPhillips statements as they are published
 - Request custom data files in user defined formats such as Excel, CSV, TXT, etc.Please contact PDS at GBSupport@pdsenergy.com to request access.

- **Capitalize Consulting** – Capitalize Consulting's iGB application will be available June 30th. For the interim period between April 1st and June 30th, Capitalize Consulting will email gas balancing data upon request.
 - On June 30th view and download both current and historical statement PDF's for free
 - Enroll for premium services which include CSV format, standard analytical & custom reports, and manual entry of statements not found online
 - Enjoy the roadmap of future features including dual APIs (Data API Interface and Well API # cross-referencing)Please contact IGBSupport@CapitalizeConsulting.com to discuss service options or request data. User registration information will be mailed to you before June 30, 2022.

If you have questions regarding ConocoPhillips' gas balancing statements or this transition to PDS and iGB please email GasBalancing@COP.com.

Thank you,

Sharon Hildebrand
